Student Design Competition (2aAAb)

Tuesday 7:00am-11:00am STUDIO FOYER/STUDIOS 1, 2, 3, 4

This competition is intended to encourage students in the disciplines of architecture, engineering, physics, and other curriculums that involve building design and/or acoustics to express their knowledge of architectural acoustics and noise control in the design of a facility in which acoustical considerations are of significant importance. Design scenario: A college with a very strong drama, vocal, and dance program intends to construct a new 700-seat theatre primarily for dramatic/spoken word and musicals. Although the main purpose of the hall is to support their drama program, the hall will also be used for speaking engagements by the school's president and other invited speakers.
